Avineon, Inc.

At Avineon, our reputation, track record, and long history in data conversion and migration services—since 1975—have earned us a long list of satisfied clients in the public and private sectors.

## Service Offerings

- Data Conversion
- Data Integration and Migration
- Backlog and Workorder Data Maintenance
- Application Development
- Project Management
- GIS Model Review and Analysis

Whether converting hard copy maps to digital formats, surveying the customer's site, collecting data, or validating existing maps or drawings, Avineon has the resources, and processes to meet the clients needs for conversion and migration services and data integration.

▶ [www.avineon.com](http://www.avineon.com)

Using a wide range of tools from the leading GIS vendors, Avineon converts drawings, schematics, and maps to systems including AutoCAD, CADTEL, ESRI, GE Smallworld, Intergraph, MicroStation, and Miner & Miner, so that spatial data can be better visualized, distributed, analyzed, and maintained.

Following data conversion, changes to facilities networks, cadastral fabric and landbase necessitate continual digital file updates.

With strategic affiliations and business partnerships with AM/FM/GIS industry leaders such as ESRI, GE Smallworld, and Miner & Miner, Avineon has been providing conversion and migration services to various clients for many years. It is with this knowledge, training and experience, we are able to make a significant contribution to many different migration projects. Because geospatial systems are complex and require high functionality, all migration and conversion efforts need to be undertaken by firms with strong understanding and capabilities in providing these services. We at Avineon have this experience to ensure all projects are executed and delivered with confidence and accuracy.
